

# YOUR BUSINESS HAS NO TIME FOR DOWNTIME

 **CloudLuxe**  
**CONNECTIVITY**

CloudLuxe Connectivity is a carrier-diverse telecommunications MPLS network featuring the aggregation of Australia's major carriers. It connects your organisation's offices and remote users, enabling simple and secure data sharing between them.

Your business flourishes when it's correctly connected. Better workflow, increased productivity and happier employees.

If your business has multiple locations, anywhere in Australia, you face the challenge of how to most efficiently connect your sites together. Often carriers have a one size fits all approach. Solutions are designed on their available connectivity, not the best choice.

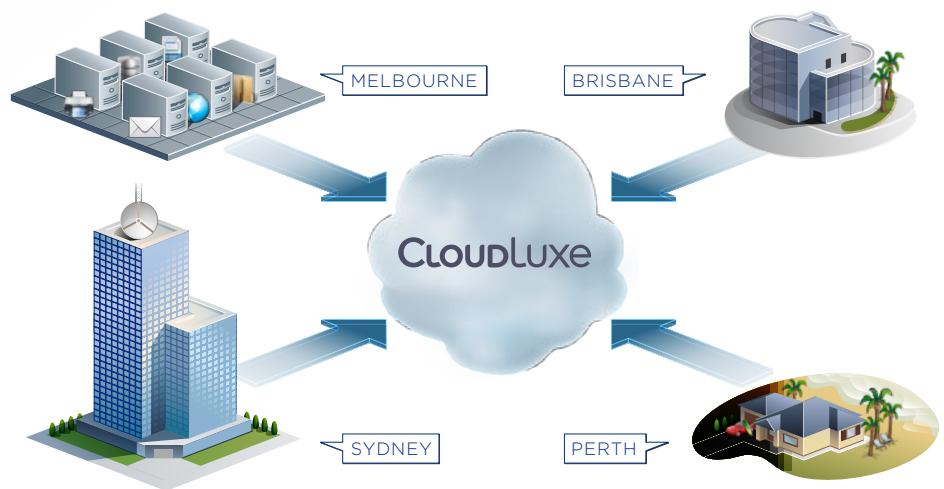

GCOMM offers you a better option: a single turnkey solution that connects all your locations, wherever they are, with a cost-effective, high-performance secure private network – CloudLuxe Connectivity.

### Business Purpose:

1. Connect your head office with your branch office.
2. Connect multiple branch offices to your head office.
3. Access unified business applications across your organisation in real time.
4. Connect your business to a purpose built data centre facility.

### Connecting with Confidence

The backbone of our managed services offering is called CloudLuxe Connectivity. It is a carrier-diverse telecommunications MPLS network featuring the aggregation of Australia's major telecommunication carriers. It connects your organisation's offices and remote users, enabling simple and secure data sharing between them. The success behind CloudLuxe Connectivity lies in the broadband infrastructure, the routing technology and the number of interconnections.

## YOUR BUSINESS HAS NO TIME FOR DOWNTIME

*With the redundant architecture, CloudLuxe Connectivity provides failover options that deliver continuous uptime for your business, ensuring operational continuity.*

### Reliable. Secure. Cost effective.

With CloudLuxe Connectivity you get a reliable site-to-site network for all your business locations, wherever they are – a network that keeps your data secure. CloudLuxe Connectivity provides traffic prioritisation, ensuring that business critical data arrives first. Built from the ground up for 'triple play' Voice, Video and Data, it allows your business to leverage the investment made. It can be deployed rapidly, so it's able to expand as your company does. CloudLuxe Connectivity is the perfect peace of mind solution for a growing business.

# Sunland Group

ESTABLISHED  
1983

## Partnership that helps grow your business

GCOMM delivered a CloudLuxe Connectivity solution to Sunland using wireless and copper technologies with dedicated interstate bandwidth between each office location. Access speeds were substantial, with seamless automatic failover in place, enabling the business to have a stable, flexible and secure network across Australia. [Read More](#)

### Fastest connectivity.

Multiple options for the fastest access speeds available with a simple, always-on connection.

**Carrier-diverse network** A single-turn key solution that connects all your locations with a network that aggregates Australia's major telecommunications providers.

**No downtime. Service Level Agreements.** Highly redundant, with multiple failover options, no single link will ever interrupt your business continuity.

### No interoffice congestion.

Interoffice application performance bottlenecks are eliminated with our Quality of Service prioritisation.

### Increased productivity.

With optimized network performance and minimised downtime, your productivity and profit margins can go only one way – up!

### Predictable cost.

With fixed service costs and transparent billing, say good-bye to escalating charges that chip away the bottom line.

## Flexible Connectivity customised for the needs of your business

GCOMM offers the largest range of last mile access technologies available to suit your traffic requirements or physical location. Ranging from ADSL up to advanced mediums such as Ethernet, Fibre or 3G. Our different access technologies and bandwidth choices ensure a solution perfectly customised to your business.

Connectivity Options	
Broadband connections from 256Kbps to 1Gbps	
Low cost fixed line ADSL2+ to dedicated Fibre Optic Ethernet available	
Wireless services from 3G to high bandwidth point to point Microwave	
ADSL / ADSL2+	x.163 (E1)
SHDSL	Fixed Wireless (Microwave)
Ethernet over Copper	Mobile Wireless (3G)
Ethernet over Fibre	Intra-state Links
Business Data Access Service (BDAS)	Inter-state Links

Connectivity Features	
Coverage	Extensive national coverage in all states CBD, Metro and Regional.
Flexibility	Integrate all services into a single private network.
Technology	100% Cisco enabled private MPLS network
Integration	Built from the ground up for 'triple play' Voice, Video and Data
Redundancy	ADSL or advanced mediums such as Ethernet, Fibre or 3G.
Future	Supports the new National Broadband Network (NBN)
