

UNLEASH THE POTENTIAL OF YOUR BUSINESS

CloudLuxe

CloudLuxe is a secure, resilient and flexible Australia-wide Infrastructure-as-a-Service platform that resembles the building blocks of business.

GCOMM offers an infrastructure suite that will take the stress of planning and building your own IT resources off your shoulders.

Unleash the potential of your business

Whether you're a small business or a nation-wide enterprise, whether you have one office or many scattered around the country, choosing the right IT platform can make you or break you. Your business relies upon the availability of your network, software applications and its data. This reliance has made the process of deploying and managing business IT networks more complex and demanding. At GCOMM, we see the connection between our flexible, high performance IT solutions and your business' success. Our CloudLuxe platform is the IT catalyst that helps you transform your business from good to great.

CloudLuxe is a perfect solution for you if you...

1. Have multiple offices and need infrastructure and support
2. Require enterprise-grade technology delivered as a service
3. Wish to limit your capital expenditure in IT infrastructure
4. Require a flexible technology platform that can adapt to your changing business needs
5. Need an IT platform that can scale as your business grows

CloudLuxe is a secure, resilient and flexible Australia-wide Infrastructure-as-a-Service platform that resembles the building blocks of business. Engineered for over a decade, CloudLuxe is a comprehensive suite of network fundamentals that fulfills your organisations' needs for proactive managed IT services, broadband connectivity and network security combined with an offering of data management services. This scalable plug and play model gives businesses all over Australia the utmost efficiency and simplicity. For us, the Luxe lies in the recombinant nature of the platform that delivers a highly personalised, reliable and affordable solution.

An MPLS network for TVS Partnership

Using the CloudLuxe platform to integrate TVS architects offices nation wide, GCOMM provided an outsourced managed infrastructure solution from the Cloud. [Read More](#)

OUR NETWORK

The network's configuration guards against any single point of failure

To provide multiple redundancies, we partner with 11 telcom providers

You get fast and reliable network connections because of our proactive network management

Meet the Challenges of Tomorrow

CloudLuxe is delivered as a service, which enables you to free your financial resources from being tied in IT as capital investment and redistribute it where your business needs it most. At the same time, you're getting access to infrastructure and technology that usually only the largest of businesses can afford. CloudLuxe is a scalable technology platform that puts the power of enterprise-class solutions within the reach of your business, regardless of its size, empowering your growth without the limitations of underlying technology.

Every Business Needs a Solid Foundation

Our primary foundation is a resilient, reliable, aggregated broadband network that connects our data centre points-of-presence in Sydney, Melbourne, Perth, Brisbane and the Gold Coast. This infrastructure lies at the core of our offer that enables a vast network reach and broad service offering. The second foundation is the tools we employ to secure and manage the entire network. Our third foundation is the data protection strategies we use to safeguard one of our company's most valuable assets.

CloudLuxe - Technology Suite

CloudLuxe is a truly different offering. It is a cloud-based, recombinant, solution that brings numerous benefits to your business. Treat it like building blocks and customise the IT resources at your disposal to create a perfectly fitting home for your business.

CloudLuxe CONNECTIVITY

connects your head office and branch offices over our carrier-diverse MPLS network that enables you to share data simply and securely between them. It offers a wide range of broadband connectivity with national coverage, with a large number of interconnections and failovers.

CloudLuxe SECURITY

protects your network and data from external attacks. By combining E-mail server protection, firewalling, content filtering and anti virus and managed routers services your business will experience minimum downtime, resulting in increased network efficiency and business productivity.

CloudLuxe HOSTING

offers secure data centre facilities where web servers or IT infrastructure can be deployed. In addition to the best-of-breed technology, our hosting facilities offer exceptional physical security. Our hosting points of presence in Sydney, Melbourne, Brisbane, Perth and the Gold Coast offer solutions from 1RU to multiple racks.

CloudLuxe INTERNET

is our high-speed, premium grade, highly reliable Internet access. CloudLuxe Internet offers premium connectivity to the largest international gateways with flexible traffic plans.

CloudLuxe VOICE

allows for voice calls to be made over IP network using business-grade connectivity to achieve significant cost savings without compromising call quality. Making outbound calls via the CloudLuxe Voice considerably reduces your call costs.

CloudLuxe BACKUP

is a LAN-speed data backup and restore service. All your data is backed up to one onsite vault and two data centre vaults located in geographically redundant data centres in Sydney and Brisbane. CloudLuxe Backup frees you from hardware purchases, license fees, and maintenance costs associated with tape backups, letting you focus on your core business with complete confidence that your data is always safe.

CloudLuxe NETWORK ASSISTANT

is an remote monitoring and management platform that provides IT managers the software tools, which increase their insight into the company's LAN and WAN performance. CloudLuxe Network Assistant gives you the benefits of industry leading applications without the requirement to purchase licensing, servers or spend valuable time configuring a new application.

CloudLuxe STORAGE

delivers a simple way to get non-critical data offsite from production servers. With two enterprise grade disk storage systems in Sydney and Brisbane, your business can get the best in online data storage for a fraction of what it would cost to deploy a solution independently.

Luxury in the Cloud?

By definition, luxury is something that's not on the mass market.

To some people, luxury is having a private jet. To others, it's having great friends. Time to read beautiful books. Travelling to exotic places. Or having a life alongside your business.

Technology, on the other hand, is so far removed from any notion of luxury. It's often time-consuming, headache-inducing, possibly bottom-line affecting. Every aspect of it, from procuring it to living with it and doing business on it, can be confusing, boring and expensive.

Then we came up with CloudLuxe. It's so easy and comprehensive, it gives you back the time you never knew you had so you can focus on the important stuff. What could be more comforting than knowing that your business is running on a safe, reliable infrastructure and all the worries of maintaining and managing it have been taken off your back? That peace of mind that has eluded you for so long is finally within reach? Could there be a greater and more luxurious experience than knowing that things are finally safe in the CloudLuxe? We dare you to find a greater luxury than that.

They say real luxury needs substance. Maybe the time has come to rephrase that: real luxury needs infrastructure.

Benefits of CloudLuxe

Flexibility and Choice

One of the beauties of CloudLuxe is how flexible and customisable it is. Whatever you do, you should know that possibilities are endless. And, as your company grows and evolves, your IT infrastructure can grow with it too, without hindering or limiting its potential.

Reduced costs

Maintaining and managing your IT resources by yourself can be a costly, time-consuming process. By adopting CloudLuxe you will reduce your IT maintenance and management costs.

Reliability

CloudLuxe's reliability is a synergy of various factors. From the essential infrastructural reliability, to the choice of the best-of-breed technology. Our core network is rock solid and has been in operation for over a decade.

Security And Privacy

CloudLuxe provides multiple layers of security. It's built on Cisco's routing and switching technology. Our engineers are constantly monitoring our environment. In addition, customers operate within their own secure private network.

Peace Of Mind Support

You will be not left on your own – our engineers are here to advise you along the way and support you to ensure you get the very best from your investment.

"Our mission is to continuously innovate our products so we can improve your business performance and make you more successful than you were before" – Peter Thompson, Managing Director
