

PREMIUM GRADE INTERNET SERVICE WITH A MULTITUDE OF CHOICES

 **CloudLuxe
INTERNET**

CloudLuxe Internet is GCOMM's premium grade Internet service that enables our clients to get Internet access to multiple local and international upstream providers through a single gateway.

Single
Gateway

Multiple
Carriers

Flexible
Packages

Your customers know they can count on you. Because you can count on us.

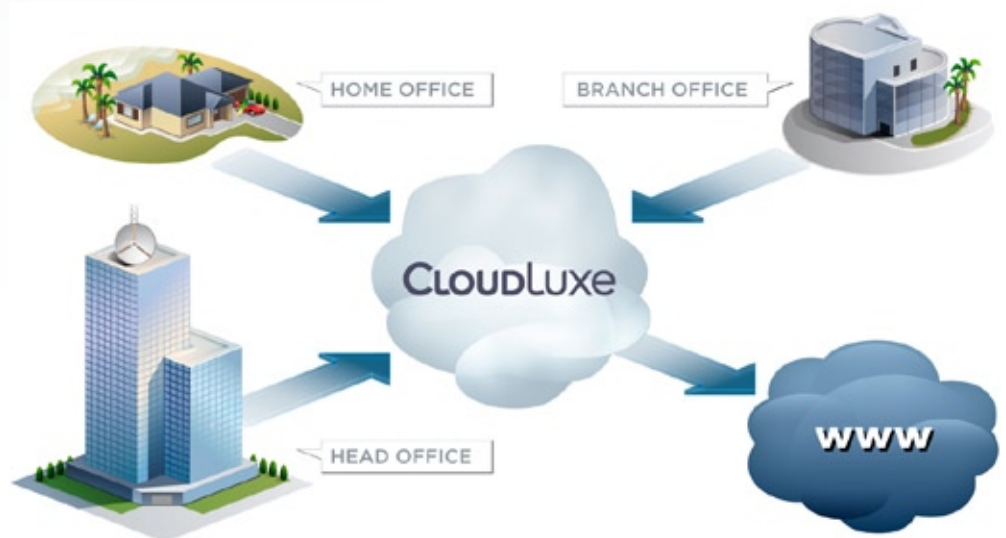

Certain businesses are regular beehives, every day. The buzzing of phone calls. Conference calls with clients. Webinar video presentations. E-mail. Data uploads, downloads, Google searches. These functions can only be as efficient and successful as the Internet provider. Our busy customers rely on GCOMM for providing top-of-the-line business grade Internet access.

Single gateway, multitude of choices

CloudLuxe Internet is GCOMM's premium grade Internet service that enables our clients to get Internet access to multiple local and international upstream carriers through a single gateway. This single gateway means that businesses can manage security policies more simply, while enforcing all external communications through a single secure point.

CloudLuxe Internet is right for you if you are a:

1. Single office business looking for a fast and reliable internet connection
2. Medium or large business seeking a single solution that addresses all of your national business Internet requirements
3. Business that wants to facilitate remote users or remote site VPN access

With our Centralised Gateway, you get:

1. Static IP address and option for routed subnets
2. Multiple upstream Carriers for premium redundancy
3. Per GB traffic packages or fixed price open pipes
4. Round-the-clock management, monitoring, and support

GCOMM facilitates CloudLuxe Internet through a centralised Internet gateway using high-speed core network Ethernet ports, providing the most efficient Internet access to all client remote sites. This design is the most reliable and scalable Internet access solution possible, because it connects your business directly to GCOMM's highly available and redundant point of presence.

As each remote site requires Internet access, they will have uncontended bandwidth directly to the centralised Internet gateway, without impacting the performance of any other sites connection.

Connecting the worlds tallest residential building

GCOMM partnered with Q1 developers to provide broadband Internet services to the residential apartment owners and hotel guests. GCOMM utilised CloudLuxe Connectivity and Internet to provide a high-speed connection to the building. GCOMM designed and deployed a fibre optic backbone through the Q1 building, providing light speed access. [Read More](#)

Simple management

The simplest way to manage all incoming and outgoing Internet traffic.

Traffic consolidation

One consolidated traffic package across entire organisation.

Single point monitoring

All malicious activity, remote user access and business wide Internet content monitored from a single point.

Scale your bandwidth. Predict the costs.

CloudLuxe Internet offers you a fully personalised solution. If you are looking for ways to cut your costs down when business is quiet, or your company is growing and needs to be more efficient, we can tailor an Internet access solution for you.

We will work with you to determine the most efficient Internet solution based on your business size and budget, your office locations, and the volume and type of data you share. We show you how to scale your bandwidth to your needs and offer fixed cost plans that give you predictable expenditure.

Features	
Redundancy	Multiple upstream carriers backend GCOMM's centralised Internet gateway.
Uncontended bandwidth	No contention, you get the service speed you pay for, all of the time.
