Do you want a cloud backup service without the headache and expense of complex infrastructure? How about offsite data replication with the benefit of an onsite back up vault that restores your data instantly?

### Increase Productivity With Our Remote Backup Service

Data is at the core of your business. Accounting and operational data, customer information and email records are all essential to business continuity. Nevertheless, protecting data in any organisation presents a unique challenge: how do you Backup your data frequently and reliably, and then store and retrieve it securely, with limited resources and no IT personnel dedicated to these tasks?

CloudLuxe Backup fully addresses these needs by providing an online Backup and restore service, which automatically backs up and protects your business-critical data in a cost-effective way, offering quick data restoration and customer support 24 hours a day.

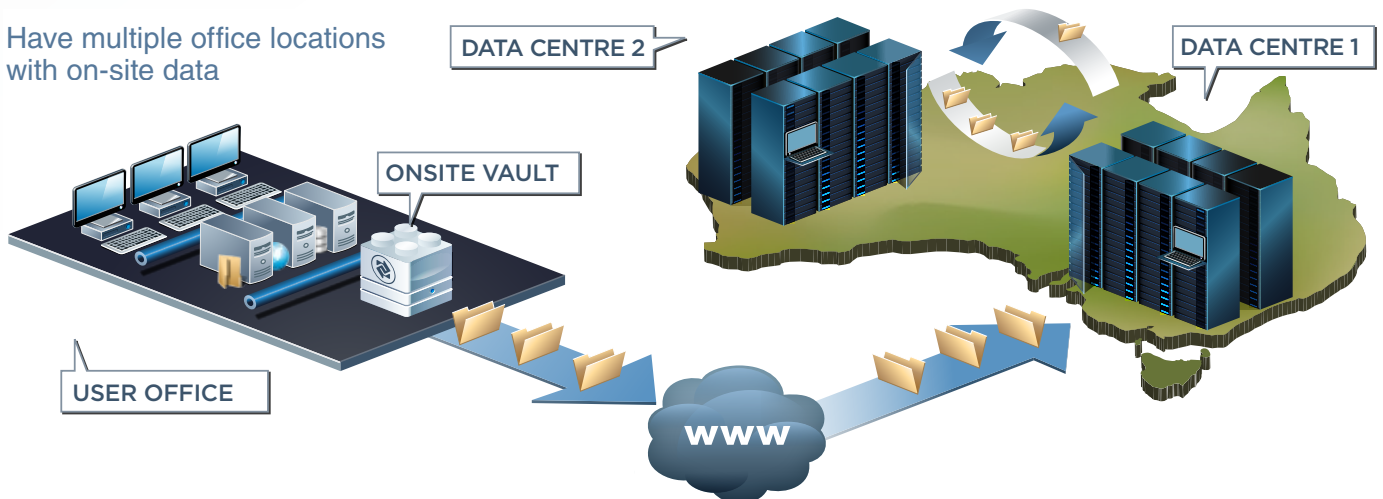

### CloudLuxe Backup is right for you if you

1. Place a high value on your data
2. Need your data restored, every time, without fail
3. Prefer to outsource Backup management and reduce the risk of human error
4. Want LAN speed Backup and restore
5. Have multiple office locations with on-site data

### Say Goodbye to Tapes

A fully managed Backup service, CloudLuxe Backup frees you from hardware purchases, license fees, and maintenance costs associated with tape Backups, letting you focus on your core business with complete confidence that your data is always safe.

CloudLuxe Backup combines the world's most advanced remote Backup and recovery software with tier one hardware manufacturers, certified secure data centres and a team of engineers 100% focused on delivering exceptional data protection and recovery services. Your company gains all the benefits of world-class technology and equipment with the advantages of a local team and easily accessible offsite Backup storage facilities located in Australia.

### Business Continuity is Crucial

All Backups are stored at three separate locations: a secure CloudLuxe Backup vault is installed in each of your business locations for instant Backup and restore. Secure, CloudLuxe Backup vaults are located in two certified secure data centres in Sydney and Brisbane for automatic offsite replication. This geographic separation ensures that in the event of a catastrophe at your site or a regional natural disaster, your company's data is safe and fully retrievable.

*“By 2014, 80% of the market will choose advanced, disk-based appliances and Backup software-only solutions over distributed virtual tape libraries”*

# Sunland Group

ESTABLISHED  
1983

## Sunland Group Gains Peace of Mind with CloudLuxe Backup Online Data Protection Service

Sunland has a head office in Surfers Paradise with branch offices located in Sydney and Melbourne. Before switching to online Backup with CloudLuxe Backup, the Group depended on tape Backup. "From an IT point of view, CloudLuxe Backup has been a fantastic insurance policy. It gives me a level of confidence that our data is being protected that I didn't have before", says Brian Dumka, IT Manager at Sunland Group. [Read More](#)

### Fully managed service

CloudLuxe Backup services are monitored in real time and a team of IT specialists experienced in all aspects of online Backup expertly manages the backed up data.

### Predictable costs

No need to invest in expensive hardware. Simply pay for the amount of data you store. Backup, storage, restoration services, software and equipment upgrades are covered by the same fee.

### Meeting regulatory requirements

If your company is subject to regulatory requirements to retain all records, CloudLuxe Backup gives you the capacity and flexibility to comply – completely and easily.

### 24/7/365 service access

Our experienced data protection engineers are available to provide reliable, trustworthy support whenever you need it.

### Instant restore

At LAN speed directly from your onsite vault or from an offsite vault via broadband. Fast physical delivery for large data volumes.

## Scalable. Automatic. Hassle-free.

CloudLuxe Backup automatically performs scheduled Backups and version management, requiring no ongoing involvement of employees or IT resources. Simply select the data to Backup, the frequency of the Backup, and how long it should be kept.

Daily reports informing you about the Backup status are automatically generated and sent to you and, when needed, data can be restored instantly directly from the onsite vault, or from an offsite vault, usually via broadband. As your data storage needs grow, the highly scalable CloudLuxe Backup vaults can support your expanding data needs.

### CloudLuxe Backup Features

#### Unlimited capacity

Highly scalable vaults can store unlimited amounts of data.

#### Agentless technology

CloudLuxe Backup uses agentless technology, so that no client software is installed on your servers.

#### Total security

Data replication to one onsite and two remote secure vaults. Full encryption during transfer and storage. You decide who has the release code.

#### Deduplication

By identifying redundant files and data as they are being stored, deduplication dramatically reduces the amount of disk storage needed to retain and protect enterprise data.

#### Data integrity

Using autonomic self healing and data validation, automated tools identify and correct problematic Backup files, so that your Backup data is valid and ready for recovery.

#### Multisystem support

CloudLuxe Backup supports the most common operating systems and databases.

## About GCOMM
