

MAXIMISE YOUR BUSINESS COMMUNICATIONS

CloudLuxe Voice is a versatile and cost effective solution that delivers the benefits and cost savings of VoIP, enabling you to leverage your existing network for both voice and data.

GCOMM provides enhancements for your business communications, by delivering voice services over an IP network at an economical price on our CloudLuxe Voice gateway.

CloudLuxe Voice helps you connect

Not long ago, “business communications” only meant calling somebody. Or, maybe mingling at an industry awards party. Today’s business communications includes voice, data, Internet, and all kinds of applications. With these tools, it’s easy to connect to your employees, partners, and customers, whether they’re around the corner or on the other side of the world.

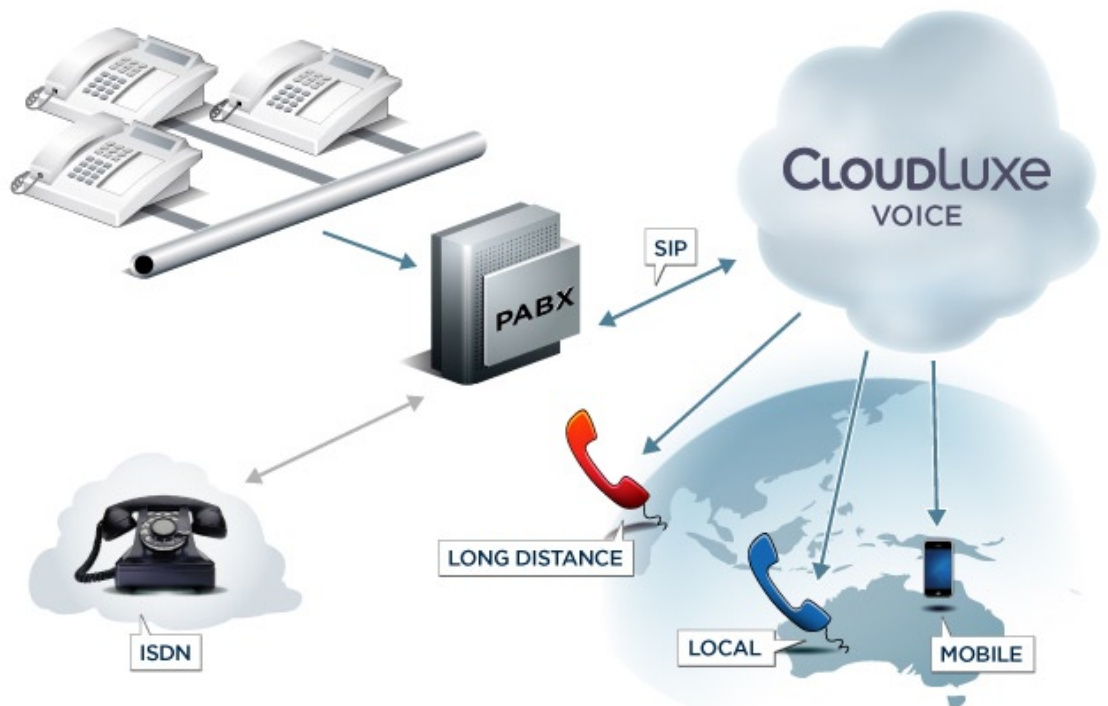

CloudLuxe Voice is a versatile and a cost effective solution that delivers the benefits and cost savings of VoIP, enabling you to leverage your existing PABX and network for both voice and data. GCOMM’s turnkey solutions for your business communications include voice services at an economical price through our CloudLuxe Voice gateway.

CloudLuxe Voice is right for you if you:

1. want to leverage your WAN investment to deliver call cost savings
2. want to reduce total cost of ownership (TCO)
3. reduce your call costs by up to 50%
4. need to increase or decrease your phone lines on demand

How does it work?

CloudLuxe Voice allows for calls to be made over GCOMM’s national network using business grade connectivity to achieve significant cost savings without compromising call quality. Businesses can make all of their calls via CloudLuxe Voice and considerably reduce their business call costs.

MAXIMISING YOUR INVESTMENT

SIP Licenses must be installed on your PABX, these licenses allow you to connect to the GCOMM CloudLuxe Voice gateway. Your business calls will then be routed via GCOMM’s network for significant cost savings without any call quality degradation.

Northbuild takes the advantage of cost-effective CloudLuxe Voice solutions

Northbuild started using GCOMM's CloudLuxe services in 2010. The company previously had problems with their interoffice network, which prevented them from using cost-effective VoIP solution. GCOMM's solution provided the new network with guaranteed bandwidth, private IP and failover. The network also enabled Northbuild to take advantage of cheaper calls through the CloudLuxe Voice service. [Read More](#)

High Voice Quality

We guarantee that customers receive the highest voice quality with unprecedented reliability.

Cost Savings

up to 50% for all call charges with CloudLuxe Voice.

Easy to Use & Support

SIP is simple and fast to configure on your PABX.

Reliability

We do not use the Internet to transport your calls like many 'retail' VOIP providers do.

Scalability

The CloudLuxe Voice allows you to use as many SIP trunks or lines as is required for your business.

SIP - the end of expensive calls

VoIP stands for Voice over Internet Protocol. The best-known example of a VoIP application is SIP or Session Initiation Protocol. SIP refers specifically to a language that allows computers or PABX's to communicate to one another for the purpose of voice calls.

It has become vitally important in recent years as the preferred way of making voice calls across the internet. VoIP & SIP are rapidly growing in popularity as millions of businesses seek to reduce their telephone bills by substituting their PSTN or ISDN services with lower call costs made using SIP.

SIP can be installed on a PABX via SIP trunks (often called a VoIP Line Card), and then connected to the GCOMM Business SIP Service. Businesses can then make all of their outbound calls via the SIP service and considerably reduce their telephony call costs.

Features:	
IP only Voice trunks using the SIP standard	From 1 line to 100's of lines
No flag fall, Per second billing	Utilises private network links
New numbers available	Local, National, Mobile or International call types supported
Business grade call quality	Inbound and Outbound services
